# A SMOOTH TRANSACTION

Motion Industries, a subsidiary of Genuine Parts Company, offers customers access to more than 4 million industrial replacement parts through a network of 500+ locations across North America.

From 2012-2014, the company is upgrading the administrative offices in many of its locations. After an exhaustive search conducted in conjunction with business products wholesaler S.P. Richards Company (a sister subsidiary), Motion Industries selected Mayline as the primary furniture supplier for this project.

In December 2012, Mayline installed 35 TransAction™ workstations and other furniture at Motion Industries in Madison Heights, Michigan.

**Triple Play.** TransAction 120° 3-Pod Workstation with Data Access Channels, Power Kits, Monitor Supports, Pedestals and Storage Tower. Acrylic Privacy Screens have been customized to a taller height than our standard 12 inches. Commute™ seating is used throughout the space.

## Perfect Fit

Motion Industries chose TransAction for its ability to meet these requirements:

- Sophisticated technology support
- Professional, contemporary look
- Layout flexibility and space efficiency
- Balance of collaboration and privacy
- Timely delivery and installation

The company reports increased productivity and employee satisfaction in all of its upgraded offices.

Clockwise from top: Santa Cruz® Lounge Seating in Black leather and Sorrento Occasional Table in Espresso enhance the reception area. All TransAction workstations feature Luna Night worksurfaces and Mist paint. Dual-sided quad stations and single-sided L stations complement 120° pods and maximize planning flexibility.
