

# Helix

## Dr. Stools

Goes Great with Work.®

**581**  
Woodford WO-543 Blueberry

**Helix** stools provide a full range of adjustable height seating for physician's offices, examination rooms and other areas of care. Most models include a foot activated ring in the base to provide a hands-free height adjustment. Braking casters on those models also ensure that the stool does not roll away when vacant. Both of these features allow the user to keep hands clean and sterile. Most models of **Helix** also are available in either a black or chrome base. Model 581 includes a back rest to ensure proper lumbar support. Select from hundreds of standard and thousands of other available upholsterys including easy-to-clean vinyl and Crypton®.

**Helix** model 582 features a molded urethane seat and black base with a hand lever height adjustment for the most economical application.
