

PowerFlex

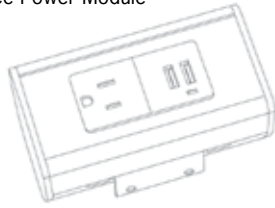

Goes Great with Work.®

PowerFlex offers built-in and add-on solutions for workstations, tables and even seating. A/C power receptacles and active USB ports are a necessity to support the prevalent mobile devices in every work and higher education environment. Workstation and table versions are standard with a 6' cord with molded plug, but are available with modular cable connectors that can be daisy chained together in training rooms or hard-wired into permanent installations.

S_
