TAILOR-MADE FOR TECHNOLOGY.

TECHWORKS®

TechWorks system with Nebula Gray HPL laminate and Textured Graphite paint.

High tech. Low hassle.

TechWorks Benches, Organizer Frames and Storage Accessories can be configured in any number of ways to meet different tasks and keep pace with evolving technologies. From single diagnostic stations to team-oriented engineering spaces, TechWorks delivers exceptional durability and flexibility along with such smart technical features as ESD worksurface options and integrated cable management. It's all backed by Mayline's Limited Lifetime Warranty.

Free Design Service. Give us your space and hardware requirements, and we'll give you a 3D CAD drawing with bill of materials. Contact us at mayline.com or call 800-822-8037.

Bench Strength. 14-gauge steel legs support up to 1,000 lbs. per Bench.

Solid Frame. Each Organizer Frame supports up to 400 lbs.

TECHWORKS®

TechWorks system with Nebula Gray HPL laminate and Textured Black paint.

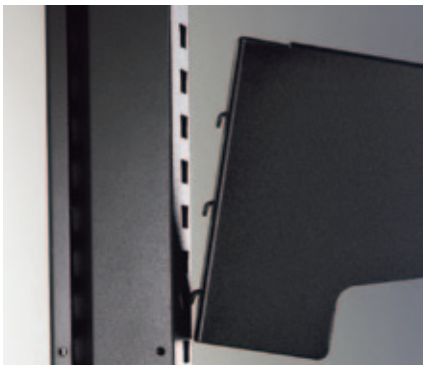
Upgraded furniture for upgraded technology.

TECHWORKS FEATURES:

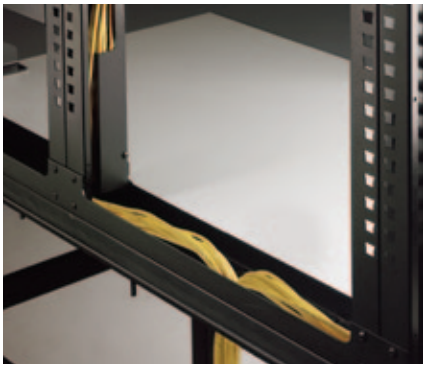
- Open frames promote team interaction
- Vertical storage minimizes office footprints
- Standard surface options include high-pressure laminate, low-pressure laminate, maple butcher block, and ESD laminate with grounding accessories
- Stainless steel surface is available upon request
- Standard options include locking overhead storage, fixed and tilting shelves, task lighting, bin storage, power strips, heavy-duty cable management accessories, pegboards and whiteboards
- Keyboards, monitor arms, and personal storage accessories make work easier and more pleasant
- Wide variety of Mayline seating complements the look and function of TechWorks

No Buckling Under. Up to 800 lbs. can be stored on shelves below worksurfaces – ideal for server storage. Shown with Nebula Graphite HPL laminate and Textured Black paint.

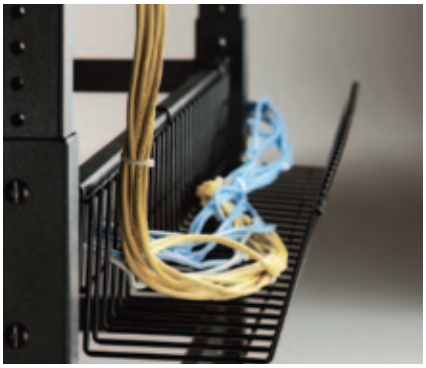
Benches can be installed at sitting or standing heights, from 26"-38" high.



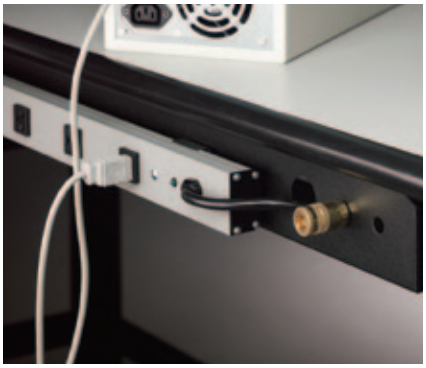
Storage options install and reconfigure above worksurfaces in 1" increments.



Organizer Frames offer both horizontal and vertical integrated cable management.



Optional baskets keep cables off the floor to maximize safety.



Air, gas and vacuum disconnect fixtures can be positioned on service bars.

ESD accessories like wrist straps and grounding bars help protect equipment.

MAYTRIX® LAN RACKING SYSTEM

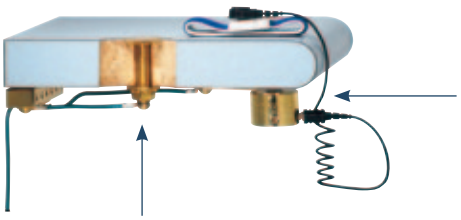
Maytrix system with Snapshot Starlight fabric by Guilford of Maine, Fog Gray TFL laminate, frames in Blue Medium paint and pedestals in Pebble Gray paint.

Easy to expand. Easy to afford.

Maytrix is a modular support system for organizing local area network, communications and monitoring equipment. The simple “building block” design allows you to easily specify, add and reconfigure components as needed. Start with heavy-duty steel frames, available in three heights, and add shelves, worksurfaces and storage units as needed. Mayline makes it even easier with three preconfigured LAN stations that meet a variety of systems needs.

MAYTRIX FEATURES:

- 11-gauge steel welded construction
- Frames bolt together to expand capacity
- Frames are slotted in 1" increments for shelves and worksurfaces
- Individual frames support up to 800 lbs. each
- Surface options include thermally fused laminate, high-pressure laminate and ESD laminate
- Optional fabric panels create a "systems" office look
- CPU floor shelves include glides or casters
- Extensive cable management and storage options
- Fixed or mobile lower shelf available



The solid brass Swivet wrist strap banana jack receiver rotates while maintaining a constant connection with ground to assure personnel protection.

The solid brass flush-mount terminals are designed to insure an intimate, permanent and reliable connection between the ESD Protective Work Surface and earth ground.

The ESD Protective Work Surface provides the static safe work area of the ESD Protected workstation by providing an electrical path to ground. It assures a common electrical potential between personnel and items handled on the surface.

e*LAN RACKING SYSTEM

Model 21172 72" LAN Station with optional keyboard supports

Store more for less.

The e*LAN Racking System is an easy, efficient, cost-effective solution for network storage. Five standard configurations meet virtually any need and each ships complete in one carton.

e*LAN FEATURES:

- 1" x 2", 14-gauge cold-rolled steel tubing
- Frames tested to 1000 lbs. per 24" frame
- Worksurfaces and shelves in thermally fused laminate
- Shelves adjust on frame in 2" increments
- Optional 2"-diameter locking casters for mobility
- Graphite paint with Ice Gray surface only
- Limited Lifetime Warranty
