Features

Chair Controls

m

PostureBack™ Control (PB)
Free floating, tension adjustable, rocking
backrest that can be locked into eight different
positions. The "anti-slap" function does not allow
the backrest to be inadvertently released.

SingleTouch™ Control (ST)
Independent adjustment of the seat and
backrest angles in one convenient lever. A
good choice for dedicated task work.

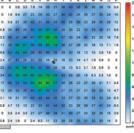

SynchroExec[™] Control (SX)
Synchronized free-float rocking, lockable in
any position and tension is adjustable for user
weight. Back angle adjusts independently for
computer work and features "anti-slap" function.

Unique Beta Features

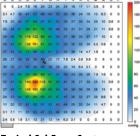

PressureCast™ Foam
Seating comfort is determined

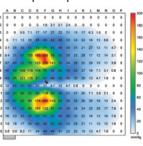

by how well the weight of the user is distributed over the seating surface. Uneven distribution causes pressure points that quickly become painful. The result is constant fidgeting by the user to relieve the pressure and loss of circulation. Compare the pressure maps to the right. Sitmatic's Pressure-Cast[™] foam distributes the user's weight evenly. The typical gel or mesh seat produces dramatic pressure points indicated by the yellow/red hot spots. Ergonomic contouring of the seat shape and high-resiliency PressureCast[™] foam result in the most supportive and comfortable seat cushions possible.

Sitmatic Pressure Cast™ Foam Even distribution of weight over seat

Typical Gel-Foam SeatPainful pressure points at buttocks

Typical Mesh SeatPainful pressure points at buttocks

Lumbar Support
The scientifically engineered shape hugs and supports the back from lumbar to thorax.

Green Check Certified

Beta chairs are independently tested to exceed Green Building Council's LEED-CI Indoor Environmental Quality Standards. IEQ 4.5 and may comply with MRS 5.0.

Intuitive QuickBack™
Allows you to move the
backrest through an unprecedented 4"range in 11
positions. Fingertip control
positions the lumbar support
exactly where you need it.

AntiScuff[™] Base
The numbs protect the
chair base and also provide
excellent traction when the
base is used as a foot perch.
