## Ergonomically Engineered for Comfort

Posh Operational Seating, with its many designs, sizes and functional options, may be custom specified for precise user requirements. Please refer to our Specification Guide or website for complete information.

POSH Operational

## Features

### Chair Controls

**Advanced Synchron Control (SY)**  
State of the art synchronized motion with independent back angle adjustment, side actuated tilt tension and seat depth adjustment.

**Basic Synchron Control (SB)**  
A simplified version of the Advanced Synchron. Seat depth and independent backrest angle are available as options.

**EZ-Tilt Control (EZ)**  
A smooth riding knee-tilt motion with tension adjustable, dual coil springs. Upright tilt lock for close work.

POSH Operational

### Unique Posh Operational Features

**PressureCast™ Foam**  
Ergonomic contouring of the seat shape and high-resiliency PressureCast™ foam result in the most supportive and comfortable seat cushions possible. Seating comfort is determined by how well the weight of the user is distributed over the seating surface. Uneven distribution causes pressure points that quickly become painful. The result is constant fidgeting by the user to relieve the pressure and loss of circulation. Compare the pressure maps to the right. Sitmatic's PressureCast foam distributes the user's weight evenly. The typical gel or mesh seat produces dramatic pressure points indicated by the yellow/red hot spots.

**Sitmatic Pressure Cast™ Foam**  
Even distribution of weight over seat

**Typical Gel-Foam Seat**  
Painful pressure points at buttocks

**Typical Mesh Seat**  
Painful pressure points at buttocks

**Easy Ratchet Back**  
A long 4" height range locks in 11 different positions- just lift the backrest to adjust.

**Lumbar Support**  
The scientifically engineered shape hugs and supports the back from lumbar to thorax.

**Cast Aluminum Base**  
The cast aluminum base is stronger and more durable than comparable plastic bases and is easier to recycle.

**Green Check Certified**  
Posh chairs are independently tested to exceed Green Building Council's LEED-CI Indoor Environmental Quality Standards. IEQ 4.5 and may comply with MRS 5.0.

## Exceptional Range of Seating Solutions

**Management, Executive and Conference Seating**

**Task and Operational Seating**

**Occasional and Stacking Chairs**
