Chair Controls

Advanced Synchron Control (SY)
State of the art synchronized motion with independent back angle adjustment, side actuated tilt tension and seat depth adjustment.

Easy-Tilt Control (EZ)
A smooth riding, knee-tilt motion with tension adjustable, dual coil springs. Upright tilt-lock for close work.

XtremeDuty Control (XD)
Available on the desk version for plus size individuals. Knee hollow tilt with upright tilt lockout. Automotive torsion bar suspension.

Unique Posh Features

PressureCast™ Foam
Ergonomic contouring of the seat shape and high-resiliency PressureCast™ foam result in the most supportive and comfortable seat cushions possible. Seating comfort is determined by how well the weight of the user is distributed over the seating surface. Uneven distribution causes pressure points that quickly become painful. The result is constant fidgeting by the user to relieve the pressure and loss of circulation. Compare the pressure maps to the right. Sitmatic's PressureCast foam distributes the user's weight evenly. The typical gel or mesh seat produces dramatic pressure points indicated by the yellow/red hot spots.

Sitmatic Pressure Cast™ Foam
Even distribution of weight over seat

Typical Gel-Foam Seat
Painful pressure points at buttocks

Typical Mesh Seat
Painful pressure points at buttocks

Rigid Steel Frame
This rugged chassis ensures durability that far exceeds wood or plastic.

Cast Aluminum Base
The cast aluminum base is stronger and more durable than comparable plastic bases and is easier to recycle.

Headrest Adjustment
An integrated adjustable headrest on high back models conforms to varying thoracic curvature.

Green Check Certified
Posh chairs are independently tested to exceed Green Building Council's LEED-CI Indoor Environmental Quality Standards. IEQ 4.5 and may comply with MRS 5.0.

Exceptional Range of Seating Solutions
